

Important: The first login must (!) be done in a browser (Chrome, Safari, Firefox,...)!

1. To log in to the app, you must enter the IServ server in addition to your name and password. For our school this is **obs-lieth-schule.de** (see also Figures 1 and 2).

Figure 1: Registration in the app.

Figure 2: When registering, the server obs-lieth-schule.de must be entered.

2. If you have more than one child at our school, you can manage the accounts for all children in the app. To do this, you need to add the other accounts. In the app, first click on the gear wheel (framed in red) at the bottom right and then on **Accounts**.

The screenshot displays the user interface of the 'obs-lieth-schule.de' app. At the top, the header shows the school's name and the user's name 'Charlie Brown'. The left sidebar contains a list of modules: E-Mail, Dateien, Adressbuch, Messenger, Kalender, Aufgaben, Videokonferenzen, Edupool, Office, Tafeln, and Aufgaben (with a count of 10). The main content area shows a greeting 'Hallo Charlie!' and several widgets: E-Mail (no unread emails), E-Mails senden und empfangen, News (no news), Kalender (today is November 16th), and Geburtstage (birthdays for Christel Schaak and Aileen Celik). At the bottom right, a settings menu is open, showing options: Link teilen, Accounts, Impressum, Seite neu laden, and Drittanbieterlizenzen. A red arrow points to the gear icon in the bottom right corner of the app, which is also highlighted with a red square.

To add a new account, click the Plus (framed in red) at the bottom right. You will now return to the registration. The login works for each additional account exactly as it is described under 1. From now on, you can always switch between the accounts via the gear wheel and the menu item Accounts.
